

## Wireless Service Provider Practice

### About Technology Executive Group

Technology Executive Group (TEG) was founded in 1995 with a mission of assisting technology companies around the world in hiring high impact professionals. It is this mission coupled with our disciplined approach to each practice area that has enabled TEG to enjoy over **90 percent** of repeat business from our trusted client base.

All of our practitioners have personally worked inside technology companies and in many cases have performed similar duties and endured similar responsibilities to the clients we serve. We understand the nuances of our client's business and have personal long term relationships with the A players in each practice area. Our clients consistently label us as **"highly responsive"** to their needs and we offer a menu of flexible services tailored to each client's solution.

Our search consultants have the expertise, industry contacts, client knowledge and credibility expected by top-tiered Wireless Service Providers. **Organizationally we have successfully completed over 2000 searches in the past 12 years in sales, sales support, sales management, marketing, finance, and corporate positions.**

TEG has an impeccable reputation in wireless, converged communications, mobile internet, computing and mobile data, and broadband. We are a proven source in uncovering superior talent and providing innovative recruitment solutions. Our ability to quickly mobilize and execute multiple-position staffing projects has set us apart from others serving the wireless industry. Our track record of success has resulted in over **90 percent** of our new recruitment assignments coming from repeat business and client referrals.

TEG prides itself in partnering with clients for the long-term, and our relationship does not end when we conclude an assignment. Value added services that we provide are executive search for your most strategic needs, 90 day on-boarding consultation, and international recruitment solutions for your critical global needs.
